

WALKER

How to Effectively Integrate Acid-Etched Glass in Exterior Glazing Systems

COURSE

Walker Glass is proud to offer architects and specifiers **this Continuing Education Course approved by the AIA and USGBC**. The purpose of this presentation is to provide in-depth knowledge of the use of acid-etched glass in exterior applications. We will provide the most up to date and detailed information to help you understand how design, functional, performance and sustainable objectives can be achieved with this type of product.

How to Effectively Integrate Acid-Etched Glass in Exterior Glazing Systems

PROGRAM OUTLINE

Understanding Acid-Etched Glass

- What is the acid-etch process?
- Acid-etched glass benefits
- Processes compatible with acid-etched glass
- Light diffusion properties
- Surface resistance

Exterior Glazing Systems

- Appropriate concealment
- Privacy with unrestricted light flow
- Enhanced colour rendering
- Design & modulation
- Bird collision deterrence
- Slip resistance for walkway applications

Performance & Sustainability

- Integration in insulated glass units
- LEED® v4 credits

Acid-Etched Glass Specifications

- Summary analysis of properties
- Key acid-etched glass specifications
- Design development process

Provider number: **K216**

Program number: **WA1703-23**

Duration: 1 hour, LU-HSW

USGBC: 0920013125
