

WALKER

Acid-etched glass and Mirror

Walker Textures® Acid-Etched Glass and Mirror

Walker's robust offering of full surface acid-etched glass solutions comes in four distinctive finishes: **Opaque**, **Velour**, **Satin** and **Satinlite**.

Acid-etched glass can be used in **interior** and **exterior** applications, provides high levels of visible light transmittance and is excellent for light diffusion.

The glass is available with single-sided and double-sided etch, in thicknesses from 3mm to 19mm. Choose from a variety of sizes, including oversize up to 100" x 204".

Sustainable Materials

EPD – Environmental Product Declaration:

- On acid-etched glass
- On acid-etched mirror and unetched mirror
- On bird-friendly Glass

HPD® – Health Product Declaration®:

- On acid-etched glass
- On acid-etched mirror
- On bird-friendly Glass

AviProtek® Bird-Friendly Glass

AviProtek® uses acid-etched markers on the outside surface of the glass, known as surface 1.

AviProtek® **E** combines the acid-etched visual markers on surface 1 with high performance low-e coatings on surface 2.

AviProtek® **T** is the highly transparent bird-friendly glass solution with a pyrolytic coating on surface 1.

Walker's Specialties

Full surface acid-etched glass is also available with low-e coatings on surface 2.

Custom acid-etched patterns are available upon request. Check with your Walker representative for more information.

Acid-etched mirrors are available in three different finishes: Velour, Satin and Opaque.

WALKER

Knowledge As a Source of Inspiration

Continuing Education

Walker offers accredited courses to architects, designers, specifiers and contract glaziers to assist you in your understanding of creative applications for the use of our products.

We encourage you to subscribe to our newsletter and follow us on social media, to stay connected with what is going on in the glass industry.
